

pBMN DHFR R12Y G67S Y100I-YFP-HA-IRES-HcRed-tandem

This plasmid contains the ampicillin resistance gene.

The DHFR R12Y G67S Y100I gene is located between BamHI/SphI.

a Kozak sequence is included at the N-terminus of the DHFR gene.

The YFP gene is located between SphI/SacII.

An HA tag is fused to the C-terminus of the YFP gene.
